To focus your searches using OneSearch try the following commands:

* treat* finds articles with the word treat, treating, treatment, etc.

OR treat* OR intervention finds articles that contain either of these words

AND dysphagia AND treatment finds articles that contain both “dysphagia” and “treatment”

“” “spastic dysarthria” finds this exact phrase

Another powerful technique is to search for your topic (keywords) in the title of articles. To do this change the dropdown menu in the AdvancedSearch from “Select a Field” to “TI Title”

For the following search example the phrase “problem based learning” must appear in the title of the article and math or mathematics or mathematical must appear in the abstract.

Be sure to limit the results to “Full Text” and “Scholarly (Peer Reviewed) Journals.”
