**Source citation (APA)**

**Author/credentials**

Credible bc author is Associate professor, Department of Social Welfare, School of Public Affairs, U. of California.

**Date/currency**

Feb. 2006. A bit dated but most research on topic appears to be from late 90s/early 2000s. Tech also changed names recently.

**Results (think PICO)**

9th grade Latino students. Significant differences post-intervention in: age wishing to parent, career/ed plans, & perceived interference of infant.

**Influence on my research**

This article supports my hypothesis that the simulation intervention is effective but doesn't indicate actual change in pregnancy rate.
